

**CLAUDE NEON
FEDERAL SIGNS**

Adair Electric has provided us with excellent service for many years. You can't go wrong with any electrical need with Adair Electric.

REASORS

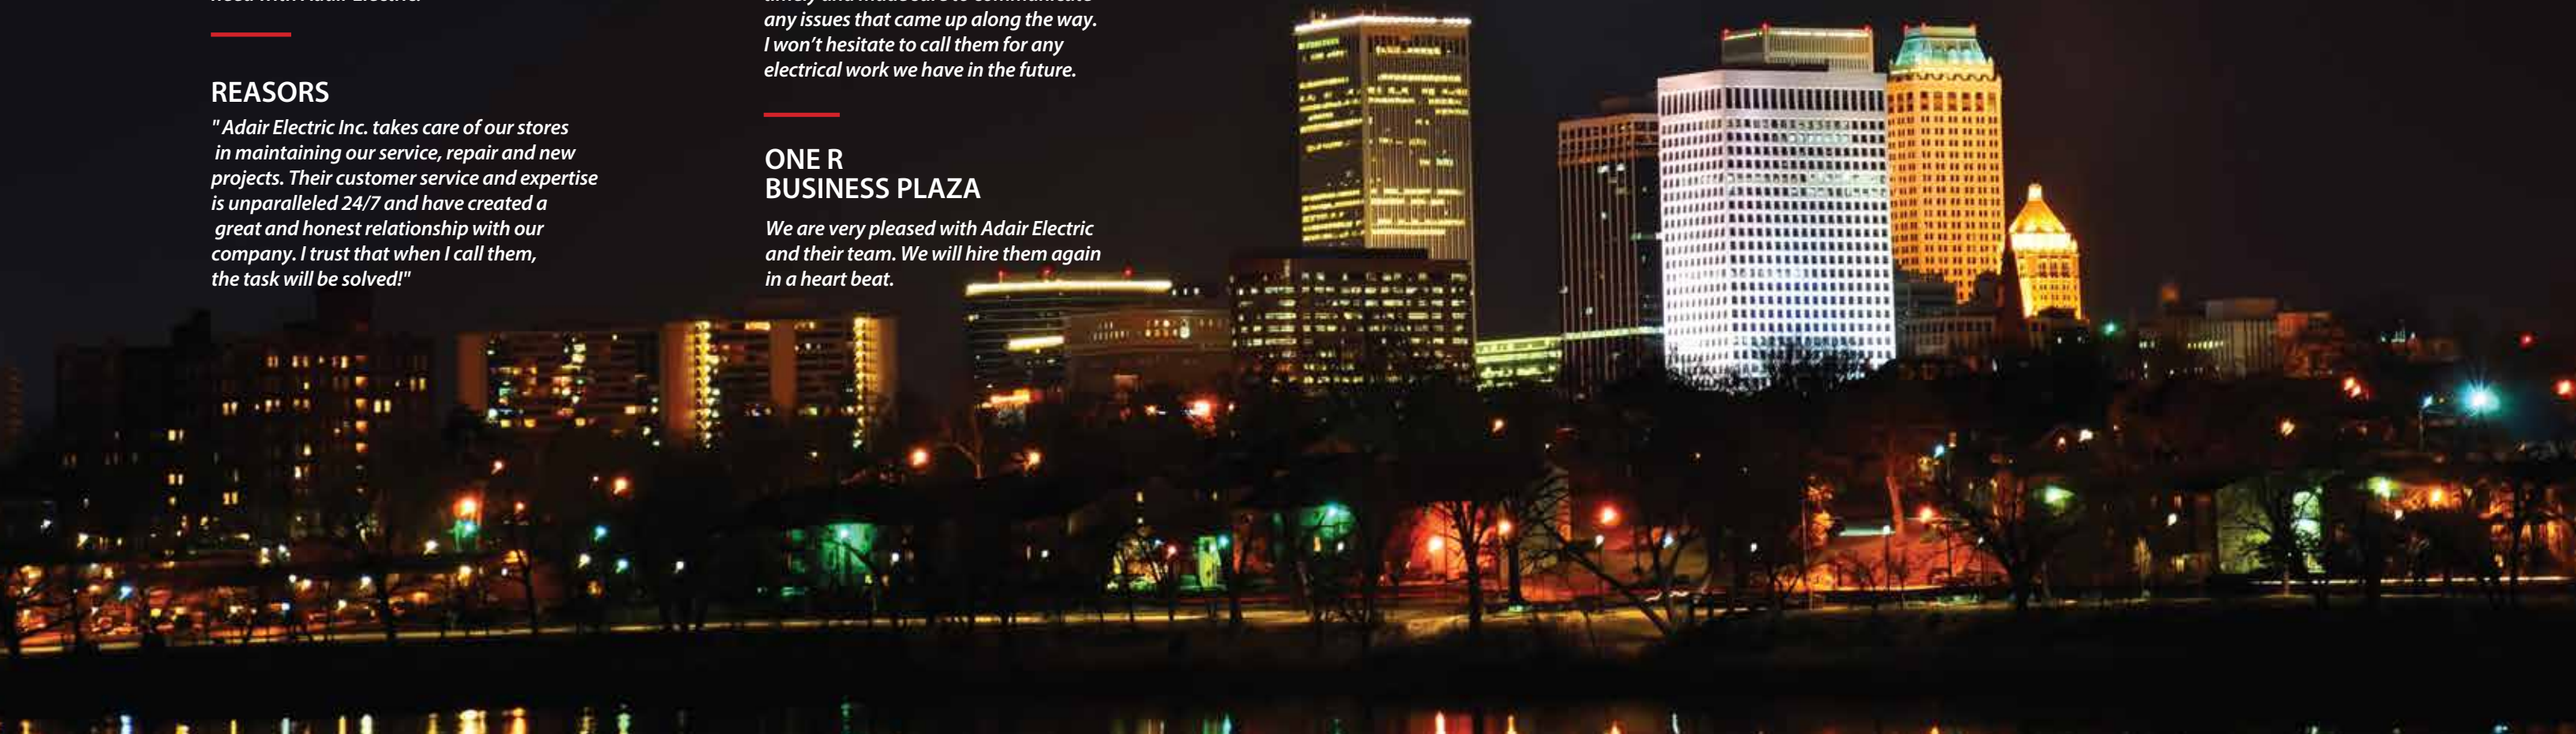

"Adair Electric Inc. takes care of our stores in maintaining our service, repair and new projects. Their customer service and expertise is unparalleled 24/7 and have created a great and honest relationship with our company. I trust that when I call them, the task will be solved!"

**CHRISTOSHER
DOOLEY**

"The crew from Adair Electric did a great job on a variety of projects in our older midtown house. They are professional, timely and made sure to communicate any issues that came up along the way. I won't hesitate to call them for any electrical work we have in the future.

**ONE R
BUSINESS PLAZA**

We are very pleased with Adair Electric and their team. We will hire them again in a heart beat.

BACKUP GENERATORS

Choosing the right home or business backup generator begins with selecting the right team. At Adair Electric, we provide complete service and support from start to finish.

Not everyone knows exactly how much power they typically use, and even more often they don't know what their standby power needs might be in an emergency situation.

If you would like a free consultation with any backup generator purchase, installation or repair give us a call. We have experience with small systems to extremely large building back systems. Everything is turn-key, pouring the concrete, natural gas to servicing the generator.

INDUSTRIAL AND SPECIALITY SERVICE

These projects range from installing electrical service to equipment, machinery, automated systems, clock towers and industrial equipment and controls.
